Please leave Microsoft alone. They have provided many jobs and technology to our nation also helping schools and many various programs. Please end these lawsuits. The lawyers are the ones getting rich over this while people are being put out of work because of a silly lawsuit. I bet giving a choice 99 percent of the people would use Microsoft over any other program. I say it is a choice you can use it or not. If you don't like Microsoft don't use any of their products but don't sue over it. It is just as simple as that. And other companies are just greedy as they didn't have the brains like Bill Gates to figure out all of this. I say give the guy credit for all he has done and invented. It amazes my mind what he has done to make it easy to communicate with the world and to type letters without carbon paper and to erase easy. And to figure out computer programs. Guess this gives you a clue to my age. We have come a long ways thanks to Bill Gates. By keeping on with the lawsuits you make it hard for them to innovate so please get put an end to the lawsuits. Thanks Joyce Siemens
